Re: Report of gross ore mined and waste removed - attachment to Progress Report

Cornerstone Industries just received the transfer of permit in October of 2013. Several thousand tons of ore was previously extracted and crushed and is stockpiled at the mine location. We are approximately 45 days from completion of our Pilot plant and plant to begin moving the stockpile during that time.

No further ore will be mined from the site until the current stockpile has been removed, this could take as long as I year.

Please let me know if you have any further questions about this mine and permit – we look forward to getting started after a long process of transfers.
